

Doors & Handles

1

Oak or white

The guide is split into oak veneer doors and white doors.

2

Pick a style & finish

Cottage, Classic or Contemporary, then unfinished, primed or pre-finished.

3

Pick a handle

Choose a handle design and finish from the handles section.

Write your door and handle codes on the last page and send it back to us, and we'll price everything up. Every door is supplied and fitted by McKee Joinery with matching hinges and latch. Oak doors are real oak veneer on a solid engineered core (not solid oak). **Unfinished** oak and **primed** white doors are left ready for your decorator to oil or paint (finishing is not included); **pre-finished** doors arrive ready to hang. The core type is shown on each door.

Trimming & planing: doors often need to be trimmed or planed to fit, especially in older or out-of-square frames. Where a pre-finished or primed door is trimmed or planed, the cut edges will need a light touch-up (re-oiling, lacquering or painting) to match. We're happy to take care of this for you for a small additional charge, which we'll confirm before any work begins.

Handles on roses

Designer lever handles · concealed fixings · matching latch & hinges included

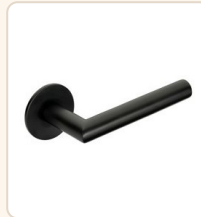

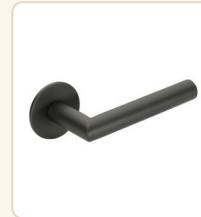

Choose a handle design and a finish. Every handle is supplied as a set with a matching latch and hinges. **Fire rated** handles are certified for 30 and 60 minute fire doors; **slim rose** handles have a minimal 3mm rose for a modern look. A matching bathroom privacy turn is available for WC, bathroom and en-suite doors in matching finishes.

Handles on backplates

Lever handles on a backplate · matching latch & hinges included

Prefer a handle on a backplate? These suit cottage and period doors as well as modern homes. Choose a design and a finish – every handle is supplied as a set with a matching latch and hinges. Where it says **bathroom version available**, the same handle comes with a privacy turn built into the backplate for WC, bathroom and en-suite doors.
